

**Stephan Lampl**

B.D.S. M.D.T. B.B.A.

CEO of edelweiss dentistry  
Member of the Austrian  
Association of Oral and  
Maxillofacial Surgery  
Member of the OEAED

*«By developing the right composite technology, the manufacturing process became laborious since we had to overcome the challenges of the nature such as shrinkage, discoloration, breakage, ect., which is common to composite resins and overall providing outstanding restorations which can not be achieved by the free hand layering composite techniques.*

*It was a rigid process collecting the data, then applying it to create a finished product that would represent the technology that is a cut above the rest. The idea behind is to simplify the the treatment process as well as the quality outcome.»*

Like all great inventions made at the basement in the likes of the late Steve Jobs or Bill Gates, the story of another brilliant inventor who hails from Wolfurt, Austria has conquered the dental industry with the rise of edelweiss dentistry. Since its launch, edelweiss has been known to pioneer the only direct veneering system that has overcome the disadvantages of organic fillers that are commonly used in composite veneers. Using the laser sintered concept invented by Dr. Stephan Lampl, CEO and Founder of edelweiss dentistry, this technology has surpassed the bounds of composite failure rates, thereby obtaining greater aesthetics and function.

Bordering genius, Dr. Stephan Lampl is one of the most celebrated man today in the dental profession claiming the first and only laser sintered prefabricated veneering system that surpasses patient expectations using simple and controlled clinical procedures.

# Abstract

## WORK EXPERIENCE

**1989: Licensed in Dental Technique CDT, at the Dental Technology School Vienna, Austria A**

**1991: Master Degree MDT, at the Académie d'Art Dentaire Genève, Switzerland CH**

**1996: Licensed in Dentistry B.Ch.D, Bachelor of Dental Surgery (B.D.S) at the University of the Western Cape, Cape Town/Stellenbosch, South Africa ZA**

**1998: Master Clinician in Restorative Dentistry at the Geneva Smile Center of Prof. Didier Dietschi, Geneva, Switzerland CH**

**2001: Diploma in General Management, Business Administration and Marketing BBA, at the University of St. Gallen HSG, Switzerland CH**

**2009: Master Clinician in Esthetic Dentistry at the School of Dentistry UCLA / gIDE Los Angeles, USA**

**2009: Founded Edelweiss Dentistry Products GmbH**

## Dr. Stephan Lampl

gained considerable and profound knowledge about the dental industry. He joined Coltène/Whaledent AG (Altstätten, Switzerland) and developed his career through to the position of the Vice President of Global Marketing and Member of the Board.

For more than a decade, Dr. Stephan acquired a remarkable dental career as one of the foremost and highly esteemed lecturers and KOL on a global scale. He holds a degree in MDT, B.D.S., a Master degree in Restorative Dentistry and a Master clinician degree in Esthetic Dentistry. As he is a man of many promising dreams, his achievements pose strong appraisals for his notable works today and in the future. The inspiration for his first invention goes back to 2005. It was then on with his consistent research that he invented more innovations until he was inspired to create one of the foremost veneering systems that gave birth to edelweiss.

“My patients are my greatest inspiration. Coming from a family with a strong dental background, throughout three generations, we can see the challenges of our dentists through their patients. We want to see a functional results without compromising occlusion and aesthetics so we worked on finding solutions that will answer their concerns.”
